1. Which tasks have been completed?

The frontend has been completed. We created our chrome extension with a very basic ui for users to input their query to search the page by.

2. Which tasks are pending?

Connecting frontend and backend. This includes utilizing BM25 with our extension as well as finding a web scraping library to parse the page's text.

3. Are you facing any challenges?

We are struggling to connect the extension with the webpage we are on. We are very new to web development so the main struggles tend to be with working with the extension and how the project will look in general.
